

Postcolonial Ecologies in the Global South: Explorations at the Culture/Nature Interface

Consortium for the Global South

28th & 29th June 2018

Room SG1, Alison Richard Building, 7 West Road, Cambridge.

28th June

12:45 – 13:45: Registration

13:45 – 14:00: Welcome and Introduction

14:00 – 15:15: Keynote Address: *Greening African growth and international climate justice*, Chukwumerije Okereke (Professor in Environment and Development, University of Reading)

Green growth is now one of the dominant catch-phrases in global environmental sustainability discourse. This term not only communicates new aspirations that economic growth can be de-coupled from environmental degradation; it also suggests novel ways of resolving intractable North-South disputes over equity that have plagued international environmental politics for decades. In this talk, I will provide a conceptual mapping of the landscape of green growth discourse alongside an analysis of the implications for international climate justice. Then, drawing from Gramsci's theory of cultural hegemony, I argue that while green growth offers opportunities for international justice and sustainable development in Africa, it could also constitute part of a legitimating discourse to neutralize radical visions that challenge prevailing structures of global economic injustice and societal transformation in the face of climate change.
